PROFESSIONAL SUMMARY

Team Lead and Full-Stack Software Engineer with 13+ years of experience designing, developing, and delivering enterprise software platforms using C#, .NET, ASP.NET Core, Angular, TypeScript, SQL Server, and Java. Experienced in technical leadership, software architecture, microservices, micro-frontends, REST APIs, Clean Architecture, CQRS, Domain-Driven Design (DDD), cloud-native development, distributed systems, security, and reusable software components. Currently leading technical direction for the RK.Web enterprise retirement-plan platform across frontend, backend, and shared engineering libraries. Experienced in architecture decisions, technical design, code reviews, performance improvement, mentoring, cross-team collaboration, and delivery. Also experienced in AI-assisted software engineering using AI coding assistants for architecture exploration, code generation, refactoring, debugging, documentation, and rapid prototyping with human review and testing.

CORE TECHNICAL SKILLS

Languages and Backend: C#, Java, SQL, .NET 8, ASP.NET Core, Web API, REST, Entity Framework Core, Dapper, MediatR, FluentValidation, WCF

Frontend: Angular, AngularJS, TypeScript, JavaScript, RxJS, SCSS, Micro-Frontends, Module Federation

Architecture: Microservices, Clean Architecture, DDD, CQRS, SOLID, distributed systems, dependency injection, API design, OpenAPI

Data and Security: SQL Server, Oracle, MongoDB, stored procedures, query optimization, Microsoft Entra ID, MSAL, JWT, OAuth 2.0

Cloud, DevOps and Tools: Azure, AKS, Docker, Azure DevOps, GitHub Actions, CI/CD, Git, Jira, Swagger, Visual Studio

AI-Assisted Engineering: AI coding assistants, code generation, refactoring, debugging, documentation, rapid prototyping

PROFESSIONAL EXPERIENCE

Lead Software Engineer

DataPath Ltd. | Dhaka, Bangladesh | February 2018 – Present

- Lead full-stack engineering for RK.Web, an enterprise retirement-plan platform, across Angular clients, .NET backend services, and shared libraries.
- Design Angular micro-frontends and .NET 8 services using Module Federation, Clean Architecture, CQRS, DDD, SOLID, SQL Server, and REST/OpenAPI contracts.
- Guide technical design, security, code quality, performance, engineering standards, and reusable components; mentor engineers and conduct code reviews.
- Collaborate across product, QA, and engineering; apply AI-assisted development with human review and testing. Earlier contributed to Unify, CensusMassDataService, TPAManager, and WindwardReportServer.

Software Engineer

Next IT Ltd. | Banani, Dhaka, Bangladesh | June 2015 – January 2018

- Developed an eight-module Garments Accessories ERP covering merchandising, production, inventory, finance, HR, and payroll using ASP.NET Web API, AngularJS, JavaScript, and SQL Server.
- Built a Project File Service with Node.js, AngularJS, and MongoDB; implemented database workflows and stored procedures.

Java Software Engineer

ATI Limited | Uttara, Dhaka, Bangladesh | November 2013 – May 2015

- Developed hospital scheduling and rostering and online/offline school management systems using Java, J2EE, Struts2, Oracle, and Java Swing.

SELECTED PROJECTS

eShop Microservices Architecture

.NET microservices reference system demonstrating Clean Architecture, DDD, and distributed application patterns.

GitHub: github.com/raselahmedit09/eshop-microservices-architecture

ASP.NET Core SOLID and Clean Architecture (.NET 8)

.NET 8 implementation of SOLID principles, Clean Architecture, and CQRS-oriented backend design.

GitHub: github.com/raselahmedit09/ASP.NET-Core-SOLID-and-Clean-Architecture-.NET-8

Angular Micro-Frontend

Angular standalone components with Module Federation, shell, and remote application architecture.

GitHub: github.com/raselahmedit09/angular17-microfrontend

EDUCATION

B.Sc. (Engg.) in Information and Communication Technology

Mawlana Bhashani Science & Technology University

April 2009 – September 2013 | CGPA: 3.13 / 4.00
